

Most speaking training gives you canned poses, gestures and speech effects... which reads as disconnected and inauthentic.

First, we focus on stripping away everything in your presentation style that renders you less credible. Then we show you how to enhance your natural brilliance and personality through powerful body language, voice and presence exercises.

The result? A compelling, magnetic, authentic you that can influence anyone. Welcome to...

## What Our Clients Have to Say

### Dr. Tihesha Wilson says this about us:

Working with Minerva is amazing. As a breast cancer surgeon, I give many talks regarding breast cancer. My reviews have always been good so I was quite skeptical when my Dad told me I should work with a coach. Wow...what a difference after just one session! **I was not aware of the subtle things I had been doing that rendered my presentations less effective.** Now I feel much more confident! I am greatly looking forward to my next presentations which I will approach with new energy, skills and confidence. **Working with Cindy from Minerva has been tremendously helpful. She has a magical way of getting you incorporate new skills in record time.**

### Claudia Harvey, CEO of Dig It (partnered with Kevin O'Leary) shares:

**"Just the 3 hours I had with you 4 years ago, it honed enough for me to get on even bigger stages.** When the opportunity to work with you again, it was a no brainer. You come from speaking from a different angle. I had training from other sources so *I know the routine of speaking but capturing, engaging the audience and making an impact is another level that you deliver.*"

**This three-month program includes private speech writing sessions via video conference, a two-day small group live intensive in NYC or other cities, follow up private video conference sessions and support materials such as videos and audios.**

Various program options are available.
